The group met with Dr. Tyagi to give him an update on our progress with research and our design document. We received feedback on the current iteration of the design document, and are continuing to implement this feedback.

The group also put significant effort into the newest design document assignment – Project planning. This included determining a task list, milestones, schedule, risks, etc. We met as a team to determine what the next steps would be for this semester and what our overall end goal would be next semester. From this, we formed a project timeline to schedule the next year to complete the project.

**Pending Issues**

We currently have no pending issues at the moment. Everyone has been meeting up at the designated time to work on the project and finish up the assignments due during the week.

**Plans for Upcoming Reporting Period**
